Holiday Decorating Safety Tips.

For those who plan to decorate in the next couple of weeks, Glendale Fire wants to remind you of the importance of SAFETY.

According to the National Fire Protection Association (NFPA), Christmas trees are the ignition source of approximately 300 U.S. home fires each year. In addition, 44 percent of Christmas tree fires are caused by an electrical problem or malfunction.

Here are some tips from the Glendale Fire Department and the NFPA:

- Make sure that electrical cords are in good working order.
- Regularly check your real tree for fresh, green needles. Remember to keep your tree watered at all times and make sure your tree is at least 3 feet from fireplaces, radiators, space heaters, heating vents and other sources of heat. Don't place the tree where it blocks an exit.
- Ensure outside lights, decorations and extension cords are rated for outside use.
- Carefully inspect each electrical decoration – new or old – before plugging it in.
- Do not use staples or nails to string lights.
- Create and practice your home escape plans.

More safety information can be found at www.nfpa.org.
